

# JavaScript-60Day-Challenges-

---

A 60-day JavaScript learning challenge with daily exercises, mini-projects, and hands-on practice to master core JS concepts step by step.

## JavaScript 60-Day Challenge

---

Welcome to the **JavaScript 60-Day Challenge!** This repository is designed to help you master **core JavaScript concepts** through daily exercises, mini-projects, and hands-on coding practice. The challenge is structured in a step-by-step manner so that beginners can build a strong foundation, and intermediates can sharpen their skills.

---

### Challenge Overview

JavaScript is the most widely used programming language for web development. From **frontend interactions** to **backend development** with Node.js, JS has become an essential skill for developers. This 60-day challenge focuses on **practical learning**, enabling you to write functional code, understand programming concepts, and build real-world projects.

#### Key Features:

- Daily exercises for consistent practice
  - Mini-projects to implement learned concepts
  - Pre-filled folder structure with JS files and README templates
  - Focus on core concepts like Variables, Loops, Functions, Objects, Arrays, DOM Manipulation, ES6 features, and more
  - Hands-on experience with browser events, APIs, and asynchronous programming
- 

### Structure of the Repository

The repository contains **60 folders**, each representing a day of the challenge. Every folder follows this structure:
